.0202 EXPERIENCE

(a) Primary. As used in this Chapter, primary experience means working experience gained by the applicant while engaged directly in the installation of electrical wiring and equipment governed by the National Electrical Code or work activities directly related thereto. Examples of the capacity in which a person may work in gaining primary experience and the percentages for creditable primary experience are as follows:

	Percentage
1) journeyman electrician or electrician mechanic, both meaning the same;.....	100
2) electrical foreman;.....	100
3) electrical general foreman;.....	100
4) electrical superintendent;.....	100
5) electrical general superintendent;.....	100
6) estimator for licensed electrical contractor;.....	100

In calculating accumulative primary experience, a total of 2,000 hours shall equal one creditable year. The total number of creditable years shall be calculated by dividing the total hours of primary experience by 2,000. Example: Applicant has worked in primary capacity for a total of 7,200 hours of primary experience.

$$\frac{7,200}{2,000} = 3.6 \text{ years creditable primary work experience}$$

(b) Secondary. As used in this Chapter, secondary experience means working experience gained while engaged in work or training that is related to the installation of electrical wiring and equipment governed by the National Electrical Code. Examples of the type of work or training in which a person may engage to gain creditable secondary experience and the percentages for creditable secondary experience are as follows:

	Percentage

2) time spent as an apprentice electrician or helper other than as described in subparagraphs (1) and (3) of this paragraph;.....	80

9) electric utility lineman; and.....	10
10) electric utility serviceman.....	20

In calculating accumulative secondary experience, a total of 2,000 hours shall equal one creditable year. The total number of creditable years shall be calculated by applying the percentage for creditable secondary experience and dividing the remainder hours by 2,000. Example: Applicant has 1,000 hours of work experience as a helper or regular apprentice and 2,200 hours of experience while enrolled in an approved apprentice training program: 1,000 hours at 80 percent = 800 hours secondary experience; 2,200 hours at 100 percent = 2,200 hours secondary experience;

$$\frac{800 + 2,200}{2,000} = 1.5 \text{ years creditable secondary experience}$$

(c) Other Experience. The Board shall approve other experience that it finds to be equivalent or similar to the primary or secondary experience defined in this Rule.
